

Funding Requirement

PlacementHub is currently seeking pre-seed funding to accelerate product validation, institutional onboarding, recruiter acquisition, and revenue generation.

The broader objective is to raise up to ₹50 lakhs in pre-seed capital over multiple phases to support product maturation, market expansion, customer acquisition, and preparation for a larger institutional seed round.

However, the immediate focus is on securing an initial tranche of approximately ₹10–15 lakhs, which will enable us to achieve the next set of business milestones and create a strong foundation for subsequent growth.

The funding structure is intentionally flexible and may involve:

- A single investor or strategic partner
- Multiple investors participating through smaller ticket sizes
- Phased investments linked to agreed milestones
- Strategic investors from the education, recruitment, HRTech, employability, study-abroad, or student-services ecosystem

The immediate tranche of funding will be used to:

- Complete production-grade platform enhancements
- Strengthen security, scalability, and user experience
- Onboard the first set of institutional customers
- Build recruiter participation and engagement
- Validate pricing and revenue models
- Establish measurable market traction and customer references

The larger pre-seed round of up to ₹50 lakhs is intended to support:

- Expansion across multiple institutions
- Student and alumni network growth
- Recruiter ecosystem development
- Team expansion and operational scaling
- Revenue acceleration
- Preparation for a larger institutional seed round

Investors may participate at different levels based on their interest and involvement. Partial participation is also welcome, as additional capital can be raised in subsequent phases as milestones are achieved.

The objective is not merely to fund operations, but to build a scalable platform with demonstrable traction, recurring revenue potential, and a clear path toward becoming a leading technology platform for campus placements and employability.
